San Diego Rocket Race

ALIEN INVASION!

Clue Six

Now that you've mastered the code, you'll need to be able to identify the spacecraft as either friend or foe in order to get to your next checkpoint. Use the overlay with the historical marker found at the corner of Harbor Drive & Pacific Highway to help fill in some of the blanks. Using the overlay on the landmark plaque, match up either the word on the overlay then copy down the symbols that appear in the corresponding shapes, when they are needed.

___	___	___	___	___	___	___	___	___	___	___	___	___	___	___
0001	0010	0011	0100	0101	0110	0111	1000	1001	1010	1011	1100	1101	1110	1111

0001	Check the letter that fits in overlay shape 26, and record the letter that precedes it alphabetically.
0010	Record the third letter of the name of the ship which had a cat named Jones and an android named Ash.
0011	Record the first letter of the name of the midbulk transport, classcode 03-K64, whose papers list the captain as being named Harbatkin.
0100	Record the first letter of the name of the green transport carried aboard a Jupiter Mining Corporation ship, which had a cat called The Cat and an android named Kryten.
0101	Check the letter that fits in overlay shape 4, and record the letter that precedes it by two alphabetically.
0110	Record the first letter of the third word in the command to be told to Gort, from the saucerman, who used the alias Mr. Carpenter.
0111	Check the letter that fits in overlay shape 23, and record the letter that follows it alphabetically.
1000	Record the letter that fits in overlay shape 7.
1001	Record the first letter of the name of the warp five capable ship partly crewed by a Vulcan and a Denobulan.
1010	Record the letter that fits in overlay shape 10.
1011	Check the letter that fits in overlay shape 25, and record the letter that precedes it alphabetically.
1100	Record the first letter of the name of the lost ship discovered in the event horizon of a black hole by the Palomino.
1101	Record the letter that fits in overlay shape 12.
1110	Record the first numeral in the name of the craft commanded by John J. Adams on its mission to Altair IV.
1111	Record the last Arabic numeral in the name of the mission crewed by James Lovell, Jack Swigert and Fred Haise that launched on April 11, 1970.

Now go catch that ship!

Go along the Harbor – if you reach the midway point, you've gone too far!
