Palpatine's message:

To Clone Commanders APPO, Gree, BACARA, and all troops in the field: the Jedi are planning to betray the Republic to the Separatists. Four of their leaders, including AGEN KOLAR, attempted but failed to assassinate me. Execute Order 66. Clone INTEL indicates that powerful Jedi such as Master YODA, Ki-Adi-Mundi, and STASS ALLIE may sense your motives and attempt to escape. To that effect, lock down all AIRSPEEDER traffic around the Jedi Temple, and coordinate with First Minister PRAJI to prevent any Jedi from escaping from Coruscant. After a review of HOLOCAM data, the Jedi may have developed allies among the various worlds that could help them go into hiding: AAYLA SECURA may have contacts on FELUCIA, the Wookiee TARFFUL on Kashyyyk is loyal to Yoda, and several Loyalist senators on Coruscant: GIDDEAN DANU of Kuat, BANA BREEMU of Humbarine, CHI EEKWAY, MON MOTHMA, and NEE ALAVAR. It is also suspected that some of the Jedi may be in contact with key Separatist leaders like Nute Gunray and PO NUDO. In the name of security in this crisis, I am disbanding the normal government of the Republic and will be declaring the formation of the First Galactic EMPIRE.

Then examine the unused letters vertically, from left to right, to get an alias for your target. Using that target's more commonly known name, find them on your target list and track them down.

One of the Hutts on Nar Shaddaa has hired you to deliver a message cube to a particular target outside of Hutt Space. Known sometimes as the Smugglers Moon or the Vertical City, Nar Shaddaa uses a particular way of encoding information, bouncing back and forth between two columns of text, like a stone mite zigzagging down an airshaft. Break their code to learn to whom you need to deliver the message. Each column is associated with an event – it might be handy to rearrange the columns to be in proper chronological order.

*Star Tours* opens at Disney-MGM Studios in Orlando.
